

About Me

My goal is to become a Full-stack Developer capable of building and deploying complete web applications, including front-end, back-end, database management, and AI integration. I aim to work in a dynamic environment where I can learn, gain practical experience, and improve my skills through real projects. With a growth mindset, I am eager to take on challenges, strengthen my problem-solving abilities, and contribute to the team and product.

TRẦN NHẬT THỊNH

Backend Developer | AI Integration Developer

Experience

7/2026 (In progress)
Project: E-commerce Website for Laptops and Smartphones
Developed a responsive e-commerce website for selling shoes, providing a modern and user-friendly online shopping experience.

- Position in project:**
- Frontend Developer / Full-stack Developer – Developed the frontend using Next.js, React, and Tailwind CSS; integrated MongoDB and implemented core e-commerce features.

- Task completed:**
- **Frontend Development:** Developed responsive UI using Next.js, React, TypeScript, and Tailwind CSS.
 - **E-commerce Features:** Built product search, product details, shopping cart, favorites, checkout, authentication, and Admin Panel.
 - **Database:** Integrated MongoDB for managing user, product, and shopping data.
 - **State Management:** Used React Context API to manage authentication, cart, favorites, and admin states.
 - **AI Chatbot:** Integrated an AI-powered chatbot to support product inquiries and customer assistance.
 - **SEO & Deployment:** Implemented SEO optimization and deployed the website using Vercel.

6/2025 (AI Intern | HDBank)

Project: Built AI platform and chatbot for Einstein School HCM
Developed a multi-AI web platform similar to Poe by integrating multiple chatbot APIs into a unified interface, and built a Knowledge Base-powered admissions consulting chatbot for Einstein School HCM.

- Position in project:**
- Full-stack Developer Intern
- Task completed:**
- **Project Setup:** Initialized and structured the web platform with a modern UI/UX design before implementing backend functionalities.
 - **Database Integration:** Integrated MongoDB to store user information, chatbot configurations, and system data, along with Cloudinary for image storage and management.
 - **AI API Management:** Designed backend logic to integrate and manage multiple AI APIs, including request handling and token usage monitoring.
 - **Knowledge Base Development:** Built a Knowledge Base system using ChromaDB as a vector database for embedding storage and semantic retrieval, enabling AI chatbot responses based on uploaded documents and internal data
